

Curcumin

Curcumin, the potent component of tumeric has substantial antioxidant and healing properties which have been shown to help with arthritis pain, diabetes, heart disease, Alzheimer's, and a variety of autoimmune issues. This "Indian gold" supports healing inflammation processes in the body.

Reishi Mushroom Extract

Hailed as the "mushroom of immortality", this prized fungus is the most revered and has the longest recorded history of use in traditional Chinese and Aryurvedic medicine. Reishi helps boost the body's immune system and promotes its proper regulation.

Wellmune®

This unique, patent-protected compound is an exclusive form of beta-glucan polysaccharide (or complex carbohydrate). Wellmune is clinically proven to strengthen the immune system. It boosts billions of immune cells that help keep the body healthy. Wellmune-activated immune cells are ready to respond more quickly as needed, helping to support the immune system.

Cinnamon

This potent spice has a centuries-old history as a healing substance. Using its three specific essential oils, cinnamon can aid your body's ability to fight bacteria and reduce excess inflammation by inhibiting the release of pro-inflammatory acids. Ayurvedic medicine often uses cinnamon to stimulate circulation as well as to increase the bio-availability of other herbs.

Prickly Pear Extract

The only known plant that contains 24 of a rare class set of antioxidants, betalains, that promote immune cell activity against bacteria and virus. Prickly pear also supports proper inflammation by the production of "heat shock" proteins that aid in recovery.

Astragalus

Astragalus has been used in traditional Chinese medicine for centuries to boost the body's immune system. It has antioxidant effects that inhibit free radical production.

Tart Red Cherry Extract

This antioxidant powerhouse is concentrated with anthocyanins, a powerful source of antioxidants that have shown to promote regenerative and restorative properties. Studies have shown that this homegrown superfruit delivers benefits like reducing risk factors for heart disease and supporting proper inflammation pathways.

Resveratrol

Resveratrol is a member of a group of plant compounds called polyphenols. These compounds have antioxidant properties, which act to protect the body against immune suppression and aids the inflammation system in recovery.

Elderberry Extract

Elderberry is one of the richest sources of carotenoids, flavonoids, and amino acids and has been long-prized for its antioxidant activity. This fruit contains proteins that act as messengers in the immune system to help regulate immune response.

Green Tea Extract

This leaf boasts the presence of potent polyphenol, EGCG, which has shown to increase the levels of regulatory T-cells, which play a key role in immune function and removing toxicity. Clinical trials have revealed that green tea helps improve immunity; prevents cold and flu symptoms; protects against bacterial and viral infections, allergies, and arthritis; and controls inflammation.
